Gianni Pasquinelli

Product Engineer | Frontend | AI Workflows | Spec Driven Development

giannipasquinelli@gmail.com | Rosario, Argentina | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Product oriented engineer with 5 plus years of experience building user facing features end to end using React and modern web technologies. Focused on speed, performance, and scalability, leveraging AI assisted workflows and spec driven development to reduce ambiguity and accelerate delivery.

WORK EXPERIENCE

Product Engineer* | *Holocruxe | *September 2025 Present*

Led end to end development of landing pages and brand aligned interfaces, combining product thinking, frontend architecture, and AI assisted workflows to accelerate delivery

Defined and applied spec driven development practices to structure UI implementation and reduce ambiguity between design and development

Leveraged AI to generate and refine UI systems and content, reducing time from concept to implementation and enabling faster iteration

Frontend Engineer | Avature | *March 2024 September 2025*

Delivered more than 100 client customizations with high first attempt success rate, ensuring production readiness and alignment with enterprise requirements

Built more than 20 client portals including full end to end implementations, maintaining design fidelity, accessibility, and performance standards

Collaborated with product, design, and QA teams to improve delivery quality and reduce rework

Applied structured development practices across large scale SaaS environments

Frontend Engineer | Holocruxe | *August 2023 March 2024*

Designed and implemented initial frontend architecture using Next, TypeScript, and modern UI libraries

Refactored main landing page, improving Core Web Vitals from 50 to 86 and reducing load time by 4 seconds

Developed advanced UI features including interactive 3D elements

Frontend Developer | Focus On Kids | *January 2023 August 2023*

Led development of a React website, improving performance, SEO, and increasing organic traffic by 90%

Frontend Developer | Onlines&Co | *November 2020 August 2021*

Built responsive websites using HTML, CSS, and JavaScript

PROJECTS

Platform 1810* | *Product Engineering and System Design

Designing and building a scalable platform focused on automation, data workflows, and AI assisted processes

Applying spec driven development to structure features and ensure system consistency

Job Tracker* | *Product Design and Development

Built a system to manage job applications and improve follow up efficiency using structured workflows and AI assisted iteration

TECHNICAL SKILLS

Languages: JavaScript | TypeScript | HTML | CSS

Frameworks and Libraries: React | Next | Tailwind | Three.js | Express

Product and Engineering: Spec Driven Development | Performance Optimization | Accessibility

Backend and Data: Node.js | REST APIs | Supabase

Tools and Workflow: AI Assisted Development | Git | Agile

LANGUAGES

Spanish native | English fluent C1 | Italian conversational B1

EDUCATION

Universidad Tecnológica Nacional UTN | Technical Degree in Programming | Graduated 2025
